Subject : MMW Retrofit Emission Control Device (RECD) for 320KVA DG Set – 1 Nos.

Dear Sir,

Following your inquiry and recent discussion, We would like to thank you for considering us and providing the opportunity to serve you.

We appreciate your interest in our MMW Retrofit Emission Control Devices (RECDs) and are committed to assisting you in achieving your emission reduction and regulatory compliance goals.

Please find our offer detailed in the attached

Appendices I : About MMW RECD

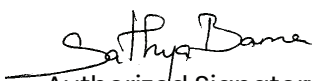

Appendices II : Price Schedule for RECD

Appendices III : Terms and Conditions

Kindly review the documents and let us know if you have any doubt, Please contact us.

Thanks and Regards

For: Maxmoc Motor Works India Pvt Ltd

Authorized Signatory

RECD -

RETROFIT EMISSION CONTROL DEVICE

Low Maintenance:

- ***Minimal maintenance*** required: only once every ***6 months or 500 hours*** of operation, whichever comes first.
- No consumables needed, reducing operational costs.

Superior Filtration:

- ***35% larger filter*** compared to competitors, ensuring enhanced pollution capture.
- ***No by-products or dumping issues*** due to efficient pollution capture & retention.

Advanced Monitoring:

Features ***online backpressure & system monitoring*** for real-time performance tracking and alerts.

CPCB Accredited Device:

Type-approved by CPCB-accredited labs for monitoring ***Particulate Matter (PM), Carbon Monoxide (CO), & Hydrocarbons (HC)***.

Compact and Space-Efficient:

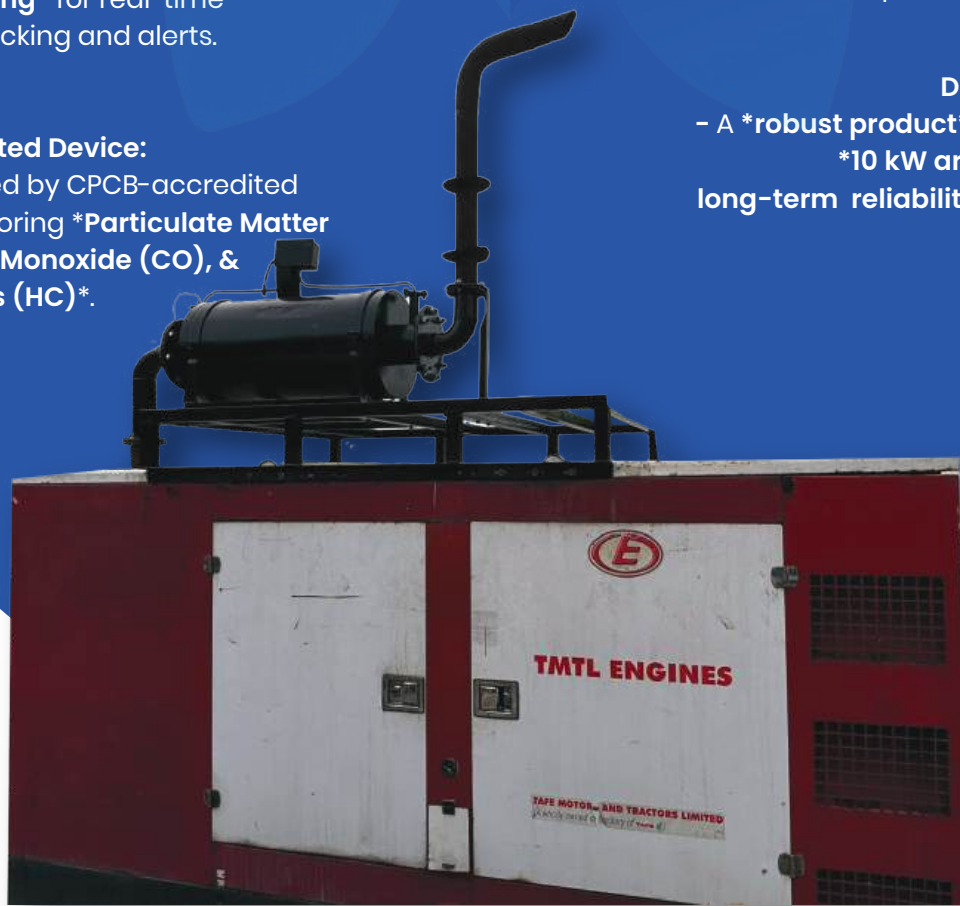

- ***Compact design*** ensures that the device requires ***minimal space*** for installation.

Noise Compliance:

- Operates within the ***permissible noise levels*** as per CPCB regulations.

Durable and Reliable:

- A ***robust product*** designed with over ***10 kW area of life***, ensuring long-term reliability and performance.

Appendices I: About MMW RECD

WHAT IS RECD ?

A retrofit emission control device is a mechanism installed at the exhaust port of a diesel generator to reduce harmful emissions. DG Set's Retrofit Emission Control System removes harmful components such as diesel particulate matter (DPM), carbon monoxide (CO), sulphur dioxide (SO₂), and nitrogen and Hydrocarbons (HC) Central Pollution Control Board under direction of Ministry of Environment, Forest, and climate Change (MoEF & CC) has been directed by National Green Tribunal (NGT) to develop & evolve the standard and norms for use of retrofitted emission control equipment or devices (RECD) having a minimum specified PM capturing efficiency of 70% for in-use DG sets below 800 kW gross power category vide order/report "Report filed in O.A. No. 681/2018 dated 6.08.2019".

WORKING PRINCIPLE OF RECD

- RECD works in two stages; one is Oxidation stage & other one is Passive Regenerative Trap.
- RECD is installed near the exhaust and the exhaust gases will act as inlet gases for the RECD. At this inlet High quality of thermal insulation provided to protect the vicinity from high temperature while maintaining the enthalpy of the system.
- When the gases come out of the exhaust there is >70 % reduction in PM, HC & CO.

Support provided from MMW for RECD installation :

- **Pre Supply Checks & Support:**
 - Pre Supply and Inspections
 - Installation Feasibility Study at Site
 - Health Check of existing DG sets.
- **Supply & Installation:**
 - Type Approved RECD with complete Solution
 - Support from MMW Care Network
 - Fleet of Trained team for on time completion of job
- **Testing & Handover:**
 - Testing of Genset on all load conditions available at site
 - Educating Customer on usage
 - Onsite Training for Customer team

WHY RECD ?

Diesel generators are a major part of almost every residential & commercial infrastructures, used as backup for power generation. DG sets are also contributors to the emission of harmful gases such as PM, CO and HC. Diesel Particulate Matter (DPM), Carbon Monoxide (CO), and Hydrocarbons (HC) are responsible for environmental & physical health damage. Equipping Retrofitting Emission Control Equipment (RECD) for DG sets is an effective and most efficient way to reduce the harmful emissions in the exhaust. of retrofitted emission control equipment or devices (RECD) having a minimum specified PM capturing efficiency of 70% for in-use DG sets below 800 kW gross power category vide order/report "Report filed in O.A. No. 681/2018 dated 6.08.2019".

CPCB COMPLIANT

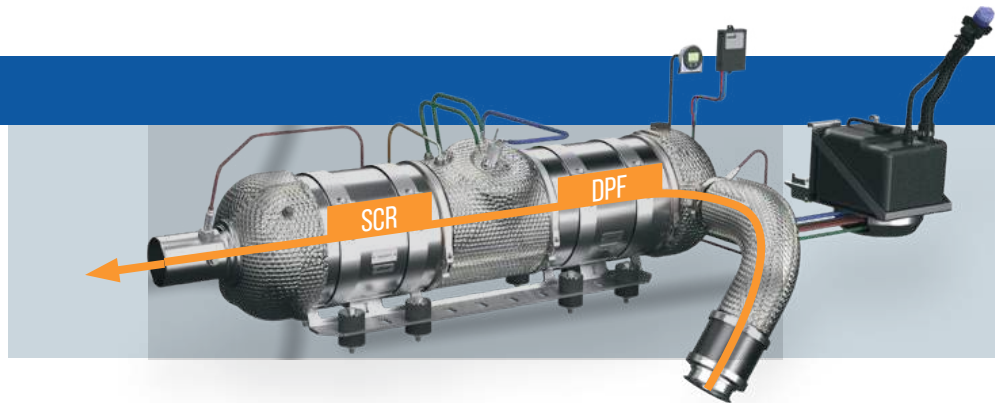

MMW RECD complies with the following criteria's mandated by CPCB:

- The MMW RECD meets CPCB's standards for particulate matter (PM) emissions, which specify the allowable limits of PM in exhaust gases.
- MMW RECD is certified by CPCB-accredited laboratories to meet the emission norms and guidelines set by the CPCB
- It maintains the secondary emissions under permissible limits & hence it is not hazardous to health.
- No Detrimental impact on General operation.

CPCB
Compliant

USP & Benefits

- ▶ Only Manufacturer to meet CAQM direction 76 for above 800kW with NOx solution
- ▶ Only RECD manufacturer to upgrade to CPCB4+ equal emission
- ▶ Reduce PM, NOx by over 90% , HC CO over 70%
- ▶ Online - real time NOx PM monitoring solution
- ▶ Temperature and Back pressure monitoring

WHY to Choose us -Solution for all ranges of GENSET

Type approved by ICAT,
CPCB accredited labs

CPCB-IV+

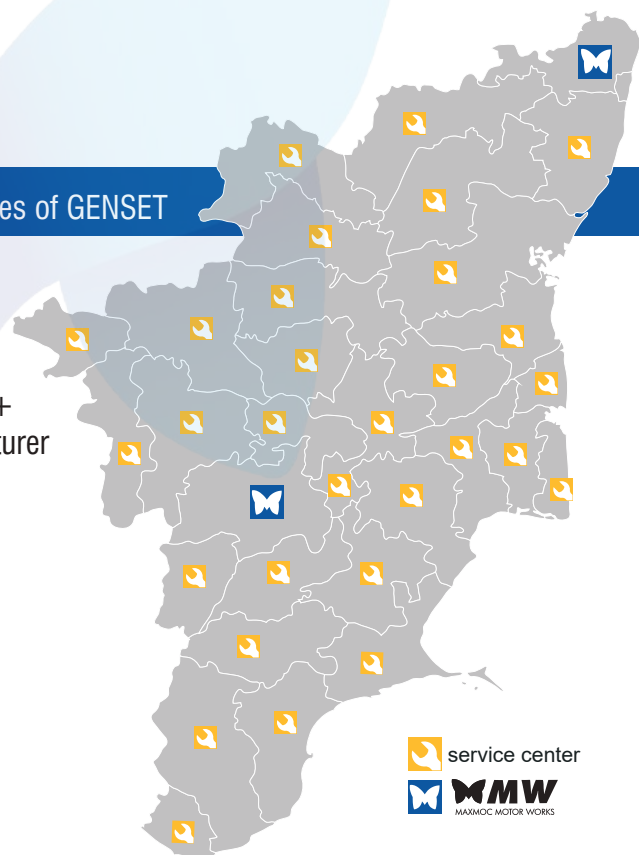

INDIA's First to UPGRADE to CPCB4+
equal Emission ONLY RECD manufacturer
to reduce NOx

Active thermal Regeneration

1 year / 500 hrs Warranty

Online real time data logging as
per CPCB guidelines

24*7 SUPPORT, BEST AFTER SALES SERVICE SUPPORT

Technological Specification

Material Structure

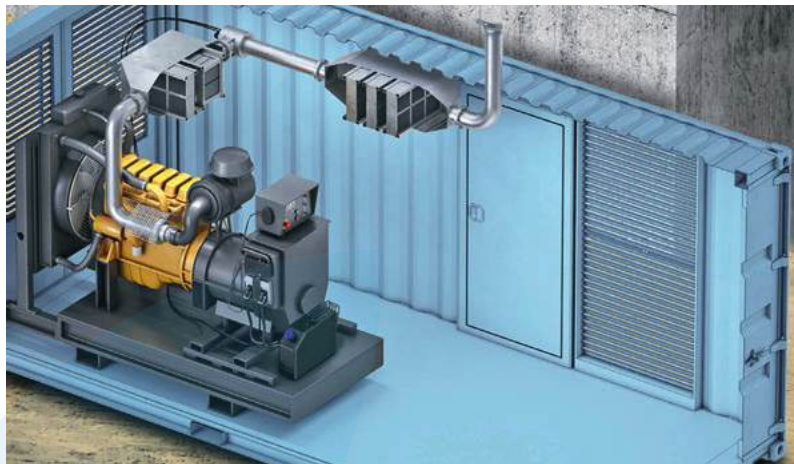

- > Material: 409 SS & 304SS
- > Heat resistant ferrite stainless steel
- > Corrosion Resistance
- > Filter life duration up to 20000 hrs.
- > High thermal withstand ceramic coating
- > Hassel free Service

MMW Smart Diagnostic System

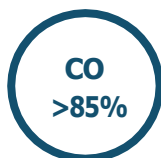

- > User friendly interface
- > Enabling effortless management of multiple display system
- > Intuitive touch controls
- > Customizable layouts
- > Managing a single screen or complex multiple display environment, RECD control panel ensure reliable operation and precise control.
- > Monitors Back Pressure & Temperature

GSTIN : 21AHYPR9559CIZQ

DESCRIPTION

S. No.	Description	HSN/SAC Code	UOM	Qty	Rate Per Unit	Amount (INR)
1	Catalytic Conversion Technology of RECD Suitable to 320kVA DG Set Including back pressure sensor, Temperature sensor, Telematics and monitoring panel (Including Logistics and Installation) with Active Regeneration	84041000	Nos	1	4,00,000.00	4,00,000.00
	Total Amount					4,00,000.00

Amount in Words: Four Lakhs Only.

Terms and Conditions

A. Supply Part

Sr.No.	Description	Remarks
1.	RECD & Panel, Delivery	4-6 weeks since receiving of PO
2.	Commissioning & Installation	One to Two weeks post delivery
3.	Electronic PCD Panel	
	a. Temperature Monitoring	Included
	b. Pressure Monitoring	Included
	c. DG Running Hours	Included
	d. Emergency Shutdown	Included
	e. DG Safety-Alarm System	Included
	f. Remote monitoring	Included

B. General Scope of Work

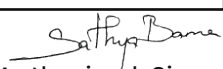

1.	Safe unloading and maintaining the Equipment at the plant area	Customer's Scope
2.	Freight Charges	By MMW
3.	Finalization on suitable Day &Time, when Power backup is not required	Customer's Scope
4.	Power Crane, if needed	Customer's Scope
5.	DG Engine Servicing, if required, during pre-installation checkup	Customer's Scope
6.	Commissioning supervision at customer's plant	By MMW
7.	Online support	By MMW
8.	Training to customer's team members	By MMW

C. Commercial Terms

Sr.No.	Description	Remarks
1	Payment Terms	60%: Advance Payment 20%: During Dispatch 20%: Against Installation
2	GST	@18% extra, as applicable
3	Warranty	Warranty covers only if AMC for RECD that must be serviced either after 500 hours of operation or once per year, whichever comes first.
4	Installation	Shall be provided by MMW by deputing a technical expert.
5	Documents	A full set of documents shall be supplied by MMW. 1. Issuance of Installation Certificate 2. Warranty Card 3. User Manual 4. Installation Manual 5. Service Manual 6. Do's & Don'ts
	Issuance of Installation Certificate	By MMW, post full payment receive.

RECD suitable for Phase II Certified Diesel Generator engine / engine families		Annexure-II	
		Annexure-III	

2. Validity of the Certificate

This Type Approval Certificate is valid for Genset engine CPCB Stage -II effective from 01.07.2014 to 30.06.2023.	a.	As per System and procedure for Emission Compliance of Retro-fit Emission Control Devices(RECD) for Diesel Power Generating Set Engines up to Gross Mechanical power 800kW as per NGT Order/report "Report filed in O.A. No. 681/2018 dated 06.08.2019 or until further amendment in the MoEFCC rule, whichever is earlier.
	b.	No change in specified RECD technical specification.

3. It is certified that the above RECD Model (Details listed in Annexure-II) comply with the emission limits for Retro-fit Emission Control Devices (RECD) to Diesel Power Generating Set Engines having Gross Mechanical Power 28.7kW to 137.2kW, as prescribed under the following rules, notified by Ministry of Environment, Forest and Climate Change (MoEFCC), Govt. of India:

Rule No.	Description	Date
CPCB-PCLS/12/2021-22	System and procedure for Emission Compliance of Retro-fit Emission Control Devices(RECD) for Diesel Power Generating Set Engines up to Gross Mechanical power 800kW as per NGT Order/report "Report filed in O.A. No. 681/2018 dated 6.08.2019	01.02.2022

4. COP : COP shall be completed by 30.06.2025 as per CPCB Procedure, for details refer COP Annexure-I.
